

End of Life Notice

Date: November 7, 2016

To: DryCal Customers & Distributors

From: Mesa Laboratories, Inc.

Subject: Product End of Life – Definer 220

Dear Mesa Customer,

Effective January 16th, 2017, Mesa Labs is discontinuing manufacturing of the Definer 220. For the foreseeable future, Mesa will continue to accept any orders for the Definer 220 up until January 16th, 2017 dependent on the availability of parts.

The Definer 220 is being directly replaced by the new Defender 530+. The Defender 530+ features the same specifications as the Definer 220, such as 0.75% volumetric accuracy of reading, easy push button interface, MFC sensor factor, and three flow ranges to choose from. For more information about this new product, please visit <http://www.brandtinst.com/bios/index.html>.

If you would like to upgrade your existing Definer 220 for a higher accuracy instrument with an increased flow range, the recently released FlexCal (http://www.brandtinst.com/bios/DryCal_FlexCal/DryCal_FlexCal.html) is the most state-of-the-art calibrator and can meet your needs.

Mesa appreciates your business and looks forward to serving you for many years to come. If you have any questions about the discontinuation of the Definer 220, please feel free to contact the US representative at marketing@brandtinst.com or your local distributor partner. To obtain an RMA for calibration or service, visit our website at <http://drycal.mesalabs.com/request-an-rma/>, contact customer service by phone at (973) 492-8400, or email us at csbutler@mesalabs.com.

Sincerely,

The Mesa Team
